

We invite you to consider purchasing a unique and exclusive *Film-Box hardware and software complex*:

<https://filmubox.com/>

The body of the Film-Box is made of solid materials (plastic, fiberboard, metal) and has a stylish design. The equipment is built into the closed parts of the box. The soft floor and wall of the chroma key are made of EVA material, which is more reliable and easier to use as it practically does not wear out and is easy to clean.

The Film-Box is easily assembled/disassembled in case you want to relocate it.

On the back wall of the box there is a TV screen on which the advertising showreel is constantly playing attracting the attention of potential customers from afar. You can add your ads or videos of your clients to this showreel.

An updated menu management system using the augmented reality technology is already working in Kyiv, Ukraine.

The price of the film-box starts from €22,500. It includes the body of the Film-Box as well as a three-month License for using our original software and a set of content (photo, video, GIF animation). Further on, the License is paid by the customer. Depending on the package, it varies from €500 to €1200 per month.

The price of the Film-Box also includes delivery and assembly at the customer's site. Delivery time is up to 5 weeks.

Maintenance and standard content updates are included in the License.

If you order special content, we negotiate the cost and terms of its production.

Operational maintenance of the box is carried out by your employee. We provide all instructional material and train the employee to use the Box.

Sincerely,

Viacheslav Garin
